Glasswool Sandwich Panel Heat Insulation Soundproof Fireproof Eco Friendly

Product Description:

Glass wool sandwich composite panel is a commonly used composite building material. The same as other types of structural insulated panels, it is also made up of two layers of structural board and one insulation core. The steel plates as outer skins offer this composite panel great strength, and the glass wool insulation material provides it with great thermal insulation.

Features:

- Excellent nonflammable performance.
 - Glass wool is incombustible and doesn't make any harmful gas since it is composed of pure minerals.
 - Excellent sound absorption property.
- Due to many small spaces in glass wool fiber, it absorbs noise well.
- Superior insulation.
- It helps to reduce heat/cooling cost due to low heat conductivity.
- Anti-corrosion.
- Glasswool sandwich panel has strong structure and superior resilience.
- Baodu we provide various types of sandwich panels to domestic and global market.
